## FOODTECH Ultragrease Extreme

Food Grade High Temperature Grease

Product Code: AVP

### Product Description

Pennine Foodtech Ultragrease Extreme is a premium quality, synthetic, food grade, polymer enhanced, extreme pressure, complex grease. The product is manufactured to InS H1 standard for lubricants where incidental food contact may occur. Incorporating extreme pressure, anti-wear, anti-corrosion, and oxidation inhibiting additives to enhance performance, as well as PTFE to provide a high degree of load carrying performance, it is insoluble in water and resists water washout. The complex thickening system gives this product excellent performance across a wide temperature range and excellent adhesion and cohesion properties.

### Applications

Recommended for the lubrication of plain and rolling element bearings, gears, couplings and many other applications which require grease lubrication found in food and beverage plants where incidental food contact may occur. Such plants include bakeries, dairies, breweries, bottling plants, canneries, animal feed plants, food packaging manufacturing plants and a wide range of other food related areas. With its exceptional water resistance this product performs particularly well in applications where frequent washing with water or steam causes problems when an inferior grease is used, the purity of this product also enables it to find use in other areas where a white, odourless, non-toxic lubricant is required, such as the textile industry.

### Typical Test Data

Foodtech Ultragrease Extreme	
Approval Number:	1795435
Product Code:	AVP
NLGI Classification	2
Worked Penetration @ 25 °C	280
Drop Point °C	265
Base Fluid Viscosity @ 40°C cSt	950
Operating Temperature °C	-20 / +220
Rust Preventative Properties DIN 1743	Pass

Certificate Number: 9480  
ISO 9001

## **FOODTECH** Ultragrease Extreme

**Food Grade Temperature Grease**

Product Code: AVP

### **Availability**

Pennine Foodtech Ultragrease Extreme is available in 180 kg, and 50 kg barrels, 12.5 kg kegs and 400g cartridges.

### **Storage**

Barrels of lubricant should always be stored in such a way that will prevent the ingress of water when stored in the open.

### **Health & Safety**

Please refer to the relevant Health and Safety Data Sheet, a copy of which is freely available to all our customers.

Data represented is typical of that obtained with normal production tolerances and does not constitute a specification. The policy of Pennine Lubricants is one of continual improvement, we therefore reserve the right to change specifications without notice.
