FOODTECH Ultragrease Universal

Food Grade Multipurpose Grease
Product Code: ARC

Product Description

Pennine Foodtech Ultragrease Universal is a premium quality food grade grease designed for use in areas where incidental food contact is possible. The product is manufactured to InSH1 standard for lubricants where incidental food contact may occur. Incorporating anti-wear, anti-corrosion and oxidation inhibiting additives to enhance performance, it is insoluble in water and resists water washout. It offers good mechanical stability, adhesion, and cohesion properties.

Applications

Recommended for the lubrication of plain and rolling element bearings, gears, couplings, and many other applications which require grease lubrication found in food and beverage plants where incidental food contact may occur. Such plants include bakeries, dairies, breweries, bottling plants, canneries, animal feed plants, food packaging manufacturing plants and a wide range of other food related areas. This product is slightly tacky, has good water wash off resistance, good corrosion resistance and good sealing properties. The purity of this product also enables it to find use in other areas where a white, odourless, non-toxic lubricant is required, such as the textile industry.

Typical Test Data

Foodtech Ultragrease Universal	
Approval Number:	1795436
Product Code:	ARC
NLGI Classification	2
Worked Penetration @ 25 °C	265-295
Drop Point °C	140min
Operating Temperature °C	-20 / +110
Rust Preventative Properties DIN 1743	Pass

Availability

Pennine Foodtech Ultragrease Universal is available in 180 kg, and 50 kg barrels, 12.5 kg kegs, 3 kg tins and 400g cartridges.

Storage

Barrels of lubricant should always be stored in such a way that will prevent the ingress of water when stored in the open.

Certificate Number: 9480
