Mould Release Oil B

Water Soluble Concrete Mould Release Oil

Product Code: ACA

Product Description

Pennine Mould Release Oil B is a water soluble, oil based, concrete mould release agent (C & CA designation CS category 4). It is designed to be an effective, economical mould release agent, supplied in concentrate form to be diluted to 10% with water for use.

Applications

Mould Release Oil B is suitable for use on non-porous mould materials in the production of relatively simple components such as flagstones, kerbstones, fence posts, etc. where a good stain free surface is required. The emulsion should be prepared by adding the concentrate to water (rather than water to the concentrate) with continuous stirring, this will produce a stable milky emulsion. The prepared emulsion may be applied to the mould/ formwork by brush, swab or spray. The product should not be over applied as this may lead to discolouration and retardation of the setting process. Mould Release Oil B must not be applied neat.

Typical Test Data

Density @ 15°C (Neat)	0.9
Estimated Coverage	6.8 m ² /L
pH (10% emulsion)	9.3

Availability

Pennine Mould Release Oil B is available in bulk, 205 litre barrels, 25 litre drums and 10 litre and 5 litre plastic bottles.

Storage

Barrels of lubricant should always be stored in such a way that will prevent the ingress of water when stored in the open. Protect from frost.

Health & Safety

Please refer to the relevant Health and Safety Data Sheet, a copy of which is freely available to all our customers.

Data represented is typical of that obtained with normal production tolerances and does not constitute a specification. The policy of Pennine Lubricants is one of continual improvement; we therefore reserve the right to change specifications without notice.
