Penclean Parts Wash Fluid

Multipurpose Degreasing & Cleaning Fluid

Product Code: ATZ

Product Description

Pennine Parts Wash Fluid is a powerful solvent based degreasing fluid designed for use in parts washers employing fluid recirculation systems. It has excellent wetting and penetrating properties and efficiently removes oil and greasy dirt deposits. It works by dissolving oil, grease and soluble dirt and by suspending and dispersing insoluble dirt particles. When returned to the static tank, the solid dirt contaminants quickly separate out along with any moisture which quickly demulsifies allowing recirculation of degreasant.

Applications

Pennine Parts Wash Fluid is recommended for use in parts wash equipment employing fluid recirculation systems. It is used for applications such as component servicing and reconditioning, to remove oil, grease, certain rust preventatives, stiff carbon deposits and general dirt.

Availability

Pennine Parts Wash Fluid is available in 205 litre barrels, 25 litre drums and 5 litre plastic bottles.

Storage

Store in sealed containers and avoid extremes of temperature.

Health and Safety

Please refer to the relevant Health and Safety Data Sheet, a copy of which is freely available to all our customers.

Data represented is typical of that obtained with normal production tolerances and does not constitute a specification. The policy of Pennine Lubricants is one of continual improvement, we therefore reserve the right to change specifications without notice.
