Microcore M6

Dewatering Fluid & Corrosion Preventative

Product Code: HS0106

Product Description

Pennine Microcore M6 is a solvent based dewatering fluid and short to medium term rust preventative. The product offers excellent dewatering properties to displace water on contact before the solvent carrier evaporates leaving a thin protective film. Microcore M6 may also be used as a cleaner/degreaser of components prior to packaging.

Applications

Pennine Microcore M6 is designed to offer short to medium term corrosion protection of components making it ideal for intermediate storage or transportation periods of up to 6 months. The product can be applied by spraying, brushing or dipping. To ensure maximum dewatering and protection properties, components should be immersed into a suitable dip tank and then allowed to drain.

When not in use the product container must be resealed to prevent the solvent base evaporating off.

Typical Test Data

Microcore M6	
Density @ 15°C	0.81
% Residue	6
Flash Point (°C)	>61
Film Thickness (Microns)	3
Indoor Protection	6 Months
Covered Outdoor Protection	1 Months

Availability

Pennine Microcore M6 is available in 1000 litre IBC's, 205 litre barrels, 25 litre drums and 5 litre tins.

Storage

Barrels of lubricant should always be stored in such a way that will prevent the ingress of water when stored in the open. Agitate before use.
